

## MCT Zero RDP Ultra Thin Client Release Note (Polish version)

---

=====

**zRDP 405 Client Firmware Version ZeroRdpPL\_201903201 20/ Mar/ 2019**

### **New Function:**

- Support the USB printer in local print.
- Support multiple printers attach in RDP client.
- Support printer USB cable hot plug in same USB port.

### **Limitation:**

- The printer of USB cable need to stay in the same USB downstream port in RDP client , not allow change the printer USB cable to different USB downstream port.
- Do not change, modify the printer port number if you have two or more printers are added.

### **Important Tips:**

- One or more printers can be attach in one RDP client , once the printer set up succeed the printer(s) will show on all desktop users and can be provide the print function for all desktop users.
- Allow the printer USB cable unplug & re-plug back in the same RDP client USB port.
- Ensure the printer is keeping in stay with the same printer port number.

**eg;** Printer A to printer port A , Printer B to printer port B.

=====
